

The Institute for Medical Education (IML) is a centre of excellence in the field of medical education. The young team of the department for software development, usability consulting and IT infrastructure (ASCII) consists of developers, system administrators, usability experts and scientists and provides services for internal and external clients. In the field of software development, we design, implement and maintain innovative e-learning and e-assessment products, which are successfully used at international educational institutions. All our developments are based on user-centric, test-driven development methods.

To strengthen our team, we are looking for an

IT Project Manager (f/m/d) 60-80%

Your work at the IML:

- Management of agile development projects (web and native applications)
- Management of mixed project teams with developers, usability experts, system administrators and product owners (about 20 people, without direct line responsibilities)
- Project coordination with internal and external clients/customers and the IML management
- Development of product strategies and concepts for technical and organizational solutions
- Organize and plan the development and release cycles of our products and services, coordinate resources and prioritize requirements
- Support of the system rollout as well as the handover into operation
- Presentation of products and services to national and international customers

Your profile:

- Several years of experience as project manager in agile software projects
- A resilient personality with strong analytical thinking and excellent communication skills that can motivate and inspire project teams
- Fast comprehension, high level of initiative as well as independent and very structured way of working
- Fluent in written and spoken German and English (French is an advantage)
- Experience in the health care and/or university environment would be an advantage

Your workplace:

- Exciting working environment at the intersection of research and development
- Cooperation in small, motivated, interdisciplinary teams
- A fully equipped usability laboratory with eye tracker
- Attractive employer with flexible annual working hours
- Diverse training possibilities
- Work location in the heart of the city of Bern (near the train station)

Philippe Zimmermann (philippe.zimmermann@iml.unibe.ch, +41 31 631 6206) is at your disposal for questions and further information. Please send your electronic application with the usual documents to Eveline Götschmann (eveline.goetschmann@iml.unibe.ch).
